

## LifeLetter November/December 2010

Dear friends of Gematria

today we will let our customers speak for themselves and quote some of their most beautiful comments on the GemWater water activators:

**"...I can confirm the effects on my body.** My hair has become stronger. My skin feels smooth after showering. In the first few days I also noticed a strong flushing of the kidneys."

*Brunhilde St.*

**"If I put the GemWater Travel into the water,** beautiful crystals will form by the waterfall (especially now with these icy temperatures, we have minus 19 degrees C). They look like the EMOTO images!!!! I have never seen this before!"

*Joachim R.*

**"This is the best investment** I have ever made. I would recommend it to everybody." And: "Friends had their swimming pool serviced 3 months after the installation of the GemWater Plus. The craftsmen were impressed with the superb quality of the water which they had never encountered during their many years of experience."

*Petronella D.*

### **And this is how a water activator works**

Water in nature is constantly moving which removes many contaminations. However, tap water often lacks vitality because it is pumped under high pressure through straight pipes. If you imprint healthy information on the water it will once again become a genuine carrier of life force. You can use the GemWater Travel water activator wherever you want to. Just put it near the water pipe - immediately valuable information is transmitted to the water. You can energise mineral water, juices, wine and other liquids in the same way. The principle: The bio-energy beamer in the activator radiates specific wavelengths, frequencies and information which cause targeted reactions in the subtle and material ranges of the activated liquid. The silica sand which has been activated by Dr Todd's light energizing technology transmits additional frequencies. And: A glass vial with healing waters also radiates frequencies. The most important advantages:

- Can be used immediately wherever you are.
- Can also be used near electrical appliances and geopathic interference fields.
- No power supply needed; maintenance free.

### **Application examples:**

- For the weekend cottage, holiday home or the hotel
- For industrial equipment using water as a cooling, solution or transport medium
- For agricultural purposes or waste water treatment plants.

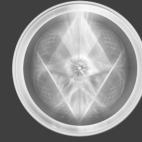

The Travel and Eco activators are also ideally suited to save oil, gas or fuel: Simply install at the feed line and save immediately! And the emissions are cleaner!

We will offer you a discount price until the end of December so that you can benefit from these extraordinary advantages. 10% price discount on all GemWater water activators. And an even greater discount of 14.4% on the GemWater Travel (see end of the LifeLetter)! Order now – further information under [www.gemwater.net](http://www.gemwater.net)!
